

To whom this may concern,

I would like to express my opinion regarding how important it is to have weather and traffic as part of my satellite radio package. I pay \$12.95 for my service and I don't see why I have to choose between commercial free radio (music) or Traffic and weather on local AM stations. The Service been provided on Satellite radio keeps me connected to 24hr traffic and weather every 4 minutes! Not ever 10 minutes after 6 minutes of pure annoying AM commercials. The reason all this people want to shut this down is because they want us to have to sit in and listen to 20+ minutes of commercial per hour. Not fair please consider that we pay for our service to not get commercials and we should not have to sacrifice our Traffic on satellite radio to 20 minutes of commercials on AM/FM stations.

Thank You,

Sergio Contreras
